<b>July 13, 1—5pm</b>	<b>HVAC Design for the Demanding Homebuyer</b>	<b>4 credit hrs</b>	<b>\$100</b>	<b>\$50</b>

Ever have a demanding customer who wants extra cooling? There are code compliant methods to double the size of the system and still get optimum performance and efficiency. This class will cover the Manual J (loads determination) and different strategies for Manual S (equipment selection) along with Manual D (duct design). Is it time to go total electric? The relative performance and cost of different types of systems using different fuels will be examined.

Instructor: Neal Ezell

**Seminar Location:** Security 1st Title, 4913 Oread W Drive, Lawrence, KS 66049
